Host story

Moneybookers has worked with Telstra International to enhance its hosting to ensure the security and 24/7 availability of its services and accommodate the increasing demand for its services. Moneybookers is regulated by the UK's Financial Services Authority (FSA), so systems and controls must always be of the highest standard.

Moneybookers is one of Europe's largest online payments systems that allows users to safely send and receive money via email. Over 10,000 new customers sign up every day to make online purchases or send and receive money. Ensuring constant availability of its services is particularly important.

Telstra International provides secure and resilient hosting at its London Hosting Centre - Docklands. Moneybookers' IT team have remote access to monitor both environment and systems from its office in Bulgaria, while Telstra International's rapid response plans for disaster recovery also guarantee the resilience of the service.
